

ACKNOWLEDGEMENT

Today my journey of PhD has come to an end. All through this journey, I have constantly thanked Almighty for blessing me with wonderful and learned people. All these years of my PhD are filled with innumerable moments that will always remain with me in my memory lane. Today I would like to take this opportunity to thank all my well wishers, friends and family members who helped me in fulfilling my dream of achieving a PhD degree.

First of all I would like to express my gratitude towards Dr Vijay Dhasmana, Hon. Vice Chancellor, Swami Rama Himalayan University for starting PhD programme in Department of Biosciences. I would also thank him for developing such a beautiful and serene environment in the campus which helps in reducing stress and in focusing on ones work.

I would like to take this opportunity to extend my heartfelt thanks to all the faculty members of various departments who taught me during the course work session. My PhD would not have started without the efforts put on by the course work faculties whose immense knowledge made it extremely easy for me to understand those subjects and pass my course work.

I would like to extend my heartfelt gratitude and respect for my mentor and guide, Dr Anupam Dhasmana, who, from the very beginning of the PhD tenure motivated me to work hard to learn new techniques and technology. He not only motivated me to remain focused towards my work but also helped me in my overall development by continuously working on my weaknesses and honing my skills. His

unique way of pushing me out of my comfort zone has actually helped me a lot in not just finishing my work on time but also in various other aspects of my life. I feel extremely blessed to have a mentor like him who has taught me some extremely precious lessons for life which I would always keep in my mind. He is a mentor in true sense, who not only focuses on work but gives equal importance to the mental and physical health of his students. Despite of his extremely busy schedule and the time difference in the working hours, he has always encouraged, comforted and supported me whenever I was in need. My words fall short in expressing my respect and gratitude towards him.

Another most important person throughout this journey is Prof. (Dr) Uma Bhardwaj. She holds a very special place in my life. She is not only my co-supervisor, but also my source of motivation and inspiration. In spite of her extremely busy schedule as Dean PhD cell, she always remained easily approachable and always made time to listen to my problems for which I will always remain grateful. Apart from keeping a close watch on my work, she also helped me in my personality development by constantly providing me various opportunities. I feel blessed to have her as my co-supervisor who always worked hard for all the PhD students so that they can work comfortably. She had strived to provide good working environment for all the PhD scholars. Her noble thoughts have always inspired me and I thank her for accepting me as her student.

I express my warm regards and gratitude towards Prof (Dr.) Archana Prakash, Head PhD Cell for accepting me as her student in an extremely crucial situation, so that I can submit my work without facing any problem. I also thank her for giving me time and helping me in preparation of my presentations. I have always felt extremely comfortable in discussing my issues with her because of her helping nature and sweet personality.

This acknowledgement will remain incomplete without the mention of the support provided by Dr Sanjay Gupta (HOD Biosciences) and Dr Vivek Kumar. I express my gratitude and warm thanks to Dr Sanjay Gupta who motivated me to join PhD in Swami Rama Himalayan University. He has remained a constant source of motivation to me. I thank him for pushing me hard to complete my work on time and for providing teaching assistantship from which I learnt a lot. I am extremely thankful to Dr Vivek Kumar, Associate professor, Department of Biosciences, who taught me to work hard and stay calm. His calm and soothing words have always helped me in my difficult times. I express my heartfelt gratitude towards him for taking out time from his busy schedule whenever I needed his support.

I would like to express my thanks to all the faculty members and staff of Department of Biosciences and PhD cell for providing support. My thanks to all the PhD scholars of Department of Biosciences for maintaining a positive and fun filled environment.

Last but not the least, I would like to express my deepest regards and gratitude towards my parents who have always allowed me to dream as high as possible and have helped me in fulfilling those dreams as well. They have lived my dreams with me and had experienced much more anxiety and tension than I had. I thank both of them for providing me all the mental, physical and financial support I needed. I am extremely blessed to be born as the youngest daughter who not only have supporting and loving parents but extremely caring brothers who have always remained by my side in my thick and thin. I express my warm regards to my sister-in-law (Senior Scientist, IgM Biosciences, USA) who has always supported me and encouraged me to ask her queries related to various aspects of life sciences. I cannot miss the opportunity to express my gratitude and acknowledge her efforts in helping me to find some important databases. Despite of extremely busy schedules and their own work load, my sister-in-law along with my eldest brother has spent sleepless nights, helping me in refining my presentation slides and teaching me the art of presentation. I am deeply thankful to my elder brother who constantly remained by my side throughout my PhD tenure and tried his best in providing me all the technical and mental support possible so that I can work comfortably. He has always taken time out of his busy schedule to lend an ear to me and helped me a lot in remaining focused by giving the best possible advice. I thank all my family members for understanding me and remaining patient with me during my tough moments. I owe everything to them.
