

List of Tables

Table No	Particulars	Page No
1	Final sorted proteins along with their network topological analysis	44-45
2	Docking results of final proteins selected from BaP rewired PPIN	46-53
3	Concentration based comparison of species when PTGS2 is upregulated by BaP	63
4	Time based comparison of species when PTGS2 is upregulated by BaP	63
5	Comparative chart of binding energy and adsorption load of BaP on SWCNT, MWCNT and Fullerene along with the binding energy of QSOX1	68
6	Topological analysis of the final proteins selected from NNK seed rewired PPIN	76-77
7	Docking results of final proteins selected from NNK rewired PPIN	80-82
8	Comparison of concentrations of various species when CDK7 is inhibited by NNK	91
9	Comparison of concentrations of various species when CCNA1 (Cyclin A) is inhibited by NNK	91
10	Time based analysis of CCNA1 inhibited graph	93
11	Comparison of concentrations of various species when CCNA1 (Cyclin A) is inhibited by NNK	95
12	Time based analysis of CDKN1B inhibited graph	95
13	Comparative chart of binding energy and adsorption load of NNK against SWCNT, MWCNT and Fullerene along with the binding energy of CDK7	99
