

LIST OF TABLES

Table No.	Title	Page
1	Sociodemographic characteristics of breast cancer patients undergoing chemotherapy & comparison between control group and experimental group	47-48
2.	Clinical variables of breast cancer patients undergoing chemotherapy & comparison between control group and experimental group	50
3.1	Comparison of Anxiety, depression and stress between control group and experimental group at baseline (cycle one)	52
3.2	Comparison of (ADSS) Anxiety subscale within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	53
3.3	Comparison of (ADSS) Depression subscale within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	54
3.4	Comparison of (ADSS) Stress subscale within and between control group and experiment group of breast cancer patients undergoing Chemotherapy	56
4.1	Comparison of quality of life (EORTC QLQ C-30) between control group and experimental group of breast cancer patients undergoing Chemotherapy	58
4.2	Comparison of Quality of Life (EORTC QLQ C-30) Global Health Status within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	61
4.3	Comparison of Quality of Life (QLQ C-30) Functional Scales- Physical Function, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	62
4.4	Comparison of Quality of Life (QLQ C-30) Functional Scales- Role Function, within and between control group and experiment group of breast cancer patients undergoing Chemotherapy	63
4.5	Comparison of Quality of Life (QLQ C-30) Functional Scales- Emotional Function, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	64
4.6	Comparison of Quality of Life (EORTC QLQ C-30) Functional Scales- Cognitive Function, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	66
4.7	Comparison of Quality of Life (EORTC QLQ C-30) Functional Scales- Social Function, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	67

4.8	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Fatigue, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	68
4.9	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Nausea Vomiting, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	69
4.10	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Pain, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	70
4.11	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Dyspnea, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	71
4.12	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Insomnia, within and between control group and experiment group of breast cancer patients undergoing Chemotherapy	72
4.13	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Loss of Appetite within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	73
4.14	Comparison of Mean & Median Quality of Life (EORTC QLQ C-30) Symptom Scales-Constipation within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	74
4.15	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Diarrhea within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	76
4.16	Comparison of Quality of Life (EORTC QLQ C-30) Symptom Scales-Financial difficulty within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	77
5.1	Comparison of quality of life (EORTC BR23) breast cancer patients in control group and experimental group at the baseline (cycle one)	79
5.2	Comparison of Quality of Life (EORTC BR 23) Functional Scales-Body Image, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	81
5.3	Comparison of Quality of Life (EORTC BR 23) scores of Functional Scales- Sexual Functioning, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	82
5.4	Comparison of Quality of Life (EORTC BR 23) Functional Scales-Sexual Enjoyment within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	83
5.5	Comparison of Quality of Life (EORTC BR 23) Functional Scales-Future Perspectives within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	84

5.6	Comparison of Quality of Life (EORTC BR 23) Symptom scales-Systemic therapy side effects within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	86
5.7	Comparison of Quality of Life (EORTC BR 23) Symptom Scales-Breast symptoms, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	87
5.8	Comparison of Quality of Life (EORTC BR 23) Symptom Scales-Arm Symptoms within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	88
5.9	Comparison of Quality of Life (EORTC BR 23) Symptom Scales-Upset by Hair loss, within and between control group and experimental group of breast cancer patients undergoing Chemotherapy	90
