

## Table of content

<b>S.No.</b>	<b>Contents</b>	<b>Page</b>
<b>1.</b>	Declaration by student	i
<b>2.</b>	Certificate by the supervisor	ii
<b>3.</b>	Certificate for plagiarism	iii
<b>4.</b>	Antiplagiarism software (as suggested by UGC/Turnitin) report of Ph.D. thesis (certified by Dean Research)	
<b>5.</b>	Certificate of successful completion of viva-voce of Ph.D.	iv
<b>6.</b>	Undertaking for submission of Ph.D. thesis	v
<b>7.</b>	Acknowledgements	vi-viii
<b>8.</b>	List of figures	xiii-xv
<b>9.</b>	List of tables	xvi
<b>10.</b>	Abbreviations	xvii-xix
<b>11.</b>	<b>Introduction (Chapter 1)</b>	1-11
<b>12.</b>	<b>Review of literature (Chapter 2)</b>	12-50
<b>2.1.</b>	Food for nutritional security: Finger millet ( <i>Eleusine coracana</i> )	14-17
<b>2.2.</b>	Global production of finger millet	17-23
<b>2.2.1.</b>	Finger millet production in India	20-23
<b>2.3.</b>	Finger millet grain's nutritional profile	23-29
<b>2.3.1.</b>	Carbohydrate	26
<b>2.3.2.</b>	Protein content	26-27
<b>2.3.3.</b>	Fat content	27-28
<b>2.3.4.</b>	Micronutrients	28
<b>2.3.5.</b>	Phytochemicals	28-29
<b>2.4.</b>	Finger millets health benefits	29-33
<b>2.4.1.</b>	Anti-oxidant properties	29-30
<b>2.4.2.</b>	Antidiabetic Characteristics	30-31
<b>2.4.3.</b>	Anti-hyperlipidemic and cardio-protective properties	31
<b>2.4.4.</b>	Combating gastrointestinal diseases	31-32
<b>2.4.5.</b>	Anti-carcinogenic properties	32
<b>2.4.6.</b>	Anti-microbial properties	33

<b>2.4.7.</b>	Osteoporosis prevention	33
<b>2.5.</b>	Micronutrients in soil: Global status	33-41
<b>2.5.1.</b>	Micronutrient deficiency in India	35
<b>2.5.2.</b>	Causes of soil micronutrient (Zn/Fe) deficiencies	35-37
<b>2.5.3.</b>	Iron deficiency in soil: Effects on plants and human health	37-39
<b>2.5.4.</b>	Zinc deficiency in soil: Effects on plants and human health	39-41
<b>2.6</b>	Biofortification of staple crop to alleviate human malnutrition: microbial approach	41-43
<b>2.7</b>	Endophytes: emerging component of microbe-mediated biofortification of Fe and Zn	43-50
<b>2.7.1.</b>	Sequestration and mobilization of iron and zinc for plant uptake via bacterial endophytes	47-50
<b>13. Materials and methods (Chapter-3)</b>		51-71
<b>3.1.</b>	Isolation of bacterial endophytes from finger millet	51-52
<b>3.2.</b>	Screening of efficient iron and zinc-solubilizing bacterial endophytes	52-53
<b>3.3.</b>	Plant growth endorsing potential of iron and zinc solubilizing bacterial endophytes	53-58
<b>3.3.1.</b>	IAA estimation	53-54
<b>3.3.2.</b>	HCN production	54-55
<b>3.3.3.</b>	Ammonia excretion	55
<b>3.3.4.</b>	Siderophore production	55-57
<b>3.3.5.</b>	Phosphate solubilization	57
<b>3.3.6.</b>	Organic acid production	58
<b>3.4.</b>	Measurement of extracellular enzyme	58-60
<b>3.5.</b>	Environmental stability of zinc solubilizers	60-61
<b>3.6.</b>	Identification of selected iron and zinc solubilizers	62-67
<b>3.6.1.</b>	Morphological characterization of the endophytes	62-63
<b>3.6.2.</b>	Biochemical characterization of the endophytes	63-66

<b>3.6.3.</b>	Molecular characterization of endophytic bacteria	66-67
<b>3.7.</b>	Effect of bacterial endophytes on Seed germination	67-68
<b>3.8.</b>	Plant experiment	68-70
<b>3.8.1.</b>	Growth parameters	70
<b>3.8.2.</b>	Analysis of nutrients	70
<b>3.9.</b>	Statistical analysis	71
<b>14. Results (Chapter 4)</b>		72-110
<b>4.1.</b>	Isolation of bacterial endophytes from finger millet	72
<b>4.2.</b>	Screening of efficient iron and zinc-solubilizing bacterial endophytes	73-76
<b>4.3.</b>	Plant growth endorsing potential of iron and zinc solubilizing bacterial endophytes	76-83
<b>4.3.1.</b>	Synthesis of IAA	76-77
<b>4.3.2.</b>	Synthesis of HCN	78
<b>4.3.3.</b>	Synthesis of Ammonia	78-79
<b>4.3.4.</b>	Synthesis of siderophore	79-80
<b>4.3.5.</b>	Solubilization of Phosphate	80-81
<b>4.3.6.</b>	Production of Organic acid	83
<b>4.4.</b>	Extra cellular enzyme production	83-86
<b>4.5.</b>	Stress tolerance potential of selected bacterial endophytes	86-87
<b>4.6.</b>	Identification of selected iron and zinc solubilizers:	88-96
<b>4.6.1.</b>	Morphological and biochemical characterization of the endophytic isolates	88-90
<b>4.6.2.</b>	Molecular characterization of promising isolates	90-96
<b>4.7.</b>	Seed germination	97-100
<b>4.8.</b>	Pot experiment for Plant growth and micronutrient (Fe/Zn) solubilization and accumulation	101-111
<b>4.8.1.</b>	Plant growth parameters	100-104
<b>4.8.2.</b>	Zinc content in finger millet grains	104-106
<b>4.8.3.</b>	Zinc content in finger millet shoot and root	106-107
<b>4.8.4.</b>	Iron content in finger millet grains	108-109
<b>4.8.5.</b>	Iron content in finger millet shoot and root	109-110

<b>4.8.6.</b>	NPK content in finger millet grains	110-111
<b>15.</b>	<b>Discussion (Chapter-5)</b>	112-124
<b>16.</b>	<b>Conclusion (Chapter-6)</b>	125-128
<b>17.</b>	<b>Summary (Chapter-7)</b>	129-137
<b>18.</b>	<b>References (Chapter-8)</b>	138-161
<b>19.</b>	<b>Appendices</b>	162-165
<b>20.</b>	<b>List of publications</b>	166
<b>21.</b>	<b>Full length published paper</b>	167-190
<b>22.</b>	<b>Certificates of conferences</b>	191-192
